DETAILED ACTION

Claims 1, 5-8, 10-12, 15-17, 20-23, 25-26 and 28 are pending and have been examined.

Claim Rejections - 35 USC § 101

1. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

2. Claims 23 and 25-26 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. Independent claim 23 recites “a web certificate system” without providing any hardware components. The entire system encompasses software only and is therefore non-statutory. Limitations to “web browser”, “web server”, “web certificate update controller” and “processing entity” are all software. Appropriate correction required.

3. Claims 1, 5-8, 10-12, 15-17, 20-22 and 28 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter. The claims are directed toward a “method” or “process” which is not tied to another statutory class. Appropriate correction may include inserting “computer executed” before the word “method” in the claims. Limitations to “web browser”, “web server”, “web certificate update controller” and “processing entity” are all software. Appropriate correction required.

Art Unit: 2193

Allowable Subject Matter

4. Claims 1, 5-8, 10-12, 15-17, 20-22 and 28 allowable if the above 101 rejections are overcome.

The following is an examiner's statement of reasons for allowance: the prior art of record fails to teach or suggest the claimed invention.

Conclusion

5. This action is not made final in view of the newly applied 35 U.S.C. 101 rejection.
